PLASTIC FOR GREAT PARTNERS

MAY PROMOTION

IP PROCESS ENHANCER

- Acts as an internal lubricant or release agent.
- Reduces machine wear and cleaning.
- Increases scratch and scuff resistance in the finished part allowing for better part nesting for transportation.
- Improves surface finish making a better-looking part.
- Lower release force & pin marking.
- Fewer rejects and less waste.

For a fraction of a penny per pound material cost, this process enhancer will, at 0.025%-0.050% letdown ratio ease the injection molding process by decreasing cycle time, reducing injection & clamp pressures and will produce an aesthetically better looking product.

PRICING on 20 pound minimum:

“F” Series for PP & PE- For materials up to 445 F.	\$2.30 FOB Houston
“S” Series for PET, PS, PA, PP & PE- For materials up to 540 F.	\$4.01 FOB Houston
“T” Series for PA, ABS & PC- For materials above 540 F.	\$4.11 FOB Houston
